

Swiss Shield® ARBOR/Arbor FR - Fabric Care Instructions

You acquired with the **Swiss Shield® Arbor/ARBOR FR** fabrics, an exclusive, high-quality technical fabric with textile properties. To ensure you enjoy your shielding textiles for as long as possible, please follow our washing instructions carefully. Our **ARBOR/ARBOR FR** fabrics, are only allowed to be dry cleaned, it is important to observe the special care instructions to extend their lifespan and maintain their quality. Here are some recommendations:

Professional Dry Cleaning: Since the fabric should only be dry cleaned, it is important to take it to a qualified dry cleaner with experience in cleaning viscose fabrics. Ensure that the cleaning service follows instructions for the use of gentle solvents to avoid damage.

Ironing: If necessary, viscose curtains can be ironed at a low temperature. Use an ironing cloth or a clean, dry cotton cloth between the iron and the fabric to avoid direct contact and prevent possible damages.

If you follow the above instructions and protect your Swiss Shield® fabrics from inappropriate mechanical loads, you will enjoy your shielding fabrics for a very long time, and the full shielding effect will remain fully intact for decades.
